Personal Summary: I am a Software Developer with a wealth of experience in teamwork, time management and deadlines. I am passionate about coding and have 14 years experience in the aviation industry, I have been able to harness those skills and pursue my passion of software development. My next career goal is to move into the Software Developer role.

Technical Skills: Software skills include:
- HTML,
- CSS,
- JavaScript,
- Python,
- Django.
- APIs
- Git

Transferable Skills: Proven team player. Peer development with management experience. Excellent communication skills. Ability to prioritise tasks. Deadline focused. All with an attention to detail that has been developed in a safety critical environment.

Education: 2021 Full Stack Software Developer Diploma (e-Commerce) – The Code Institute:
- Remote learning through lessons, challenges, self-study and pre-recorded videos.
- 5 portfolio projects –
  1. A front end website, HTML/CSS.
  2. An interactive website, HTML/CSS/JavaScript.
  3. A command line interface application, Python.
  4. A full stack website, HTML/CSS/JS/Python + Django.
  5. A full stack website, as above + stripe payment methods.

2014 Airline Transport Pilots licence (ATPL):
- Minimum 1500 hours flying time,
- 14 written exams
- At least 500 hours flying as part of a team (multi-crew aeroplane).

Work Experience	April 2016 – Present

Senior First Officer for British Airways:

- Flying long-haul, all over the world.
- Assist the Captain with communication and the safe operation of the aircraft in co-ordination with many external agencies and the team of 16 Cabin Crew.

June 2014 – April 2016

Captain for BA CityFlyer

- Flying short haul, European destinations
- Responsible for the safe running of the flight.
- Leadership. Co-ordinates the actions and priorities between external service users, the company, the First Officer, Cabin Crew and the passengers, whilst maintaining the published schedule and impeccable safety standards. Problem solving when issues arose.

August 2007 – June 2014

First Officer for Eastern Airways & BA CityFlyer:

- Specially trained to operate to challenging airfields,
- Role was to assist the Captain with the safe operation of the flight often with demanding challenges to overcome.

Key Achievements: Total flying hours in excess of 6000.

- At the start of my flying career my goal was to become an Airline Captain before I was 30. I got my Captaincy at the age of 26.
- I have had to learn to manage colleagues over a variety of ages and experiences. This has helped me develop my people management skills.
- The aviation industry has taught me how to successfully analyse risks and develop a strategy to manage risks and make informed decisions whilst maintaining strict time constraints.

2014 Member of the leadership team for a group of 40 young individuals (under 18yo) for a charity expedition to Malawi.

- Team recruitment, fundraising, planning, training, and participating in a charity trip abroad.
- The aim was to help with the young individual's development. We helped build a well and toilet block for a small village whilst learning about the local culture.

2006-2007 Involved with the planning and co-ordination of numerous charter flights.

- The tasks involved ranged from liaising with the customer directly to detailed performance calculations for payloads and fuel endurance.

Experience with the logistics of newspaper and mail delivery using aircraft to the remote islands off Scotland.

Hobbies: Computing, woodwork, cycling, playing sports, learning new skills,
